Sports: Football, swimming, running, hiking.

General culture and history

Listening to and playing music

Certifications

Microsoft PL-300 (Power BI Data Analyst)

En préparation

Microsoft

Préparation active – modélisation, DAX, gouvernance et partage.

TOEIC

Score 895.

Udemy (2021)

A-Z Python For Data Science With Real Exercises

Udemy (2024)

Microsoft Power BI Desktop for Business Intelligence

Profile

Senior Data Analyst with over 5 years of experience in Business Intelligence and advanced data analytics. Specialized in Power BI, SQL, and Python, I manage the end-to-end data lifecycle: from data structuring and pipeline automation to exploratory analysis and statistical modeling. I partner with business departments (Finance, Operations, Logistics) to deliver actionable insights through decision-making dashboards and business-impact-driven predictive analytics.

Skills

Machine Learning & Data Science

Regression, classification, clustering, time series, scikit-learn, XGBoost

Data Processing & SQL

SQL/T-SQL, ETL/ELT, Power Query, Power Automate

Visualization & BI

Power BI (DAX, M), SSRS, KPI design

Cloud & Data Infrastructure

Azure (Data Factory, Synapse, Power BI Service), AWS (S3, Redshift)

Programming & Tools

Python (Pandas, NumPy), R, Git, Excel

Experiences

Xelians Archivage

Paris

Data Analyst / BI Developer

January 2023 - December 2025 (3 years)

- Developed and automated data pipelines (SQL Server, SSRS, Power Automate).
- Built Power BI dashboards for financial, logistics, and operations teams.
- Implemented anomaly detection and forecasting models to anticipate trends.
- Ensured continuous improvement of data quality and reliability.

Tech stack: SQL Server, Power BI, DAX/M, Python, Power Automate, Git.

CIAMT (Occupational Health)

Paris

Data Consultant / BI Analyst

December 2021 - December 2022 (12 months)

- Extracted, transformed, and visualized health-related data for performance tracking.
- Conducted statistical analyses and built predictive models (regression, clustering).
- Automated dashboards and reports for healthcare professionals using Power BI.

Tech stack: SQL, Python, Power BI, R, Padoa.

CIAMT (Occupational Health)

Paris

Intern Data Consultant / BI Analyst

June 2021 - November 2021 (6 months)

- Extracted, transformed, and visualized health-related data for performance tracking.
- Conducted statistical analyses and built predictive models (regression, clustering).
- Automated dashboards and reports for healthcare professionals using Power BI.

Tech stack: SQL, Python, Power BI, R, Padoa.

Icosium Technologies

Algeria

Data Analyst

September 2019 - August 2020 (12 months)

- **Analysis & Visualization:** Created reports and dashboards to track Key Performance Indicators (KPIs) using Excel and Power BI.
- **Data Management:** Extracted, cleaned, and structured data from multiple sources to ensure the reliability of analyses.
- **Business Support:** Translated operational team requirements into concrete reporting solutions.

Stack: SQL, Excel (advanced functions), Power BI.

Educations

Master's Degree – Applied Probability and Statistics

University of Lorraine – CentraleSupélec, Metz (France)

2020 - 2021

Master's Degree – Applied Mathematics (Statistics)

University of Biskra, Algeria

2017 - 2019
