Languages

French
Native, fluent
English
Fluent – TOEIC 895
Arabic
Native
Spanish
Intermediate (B2)

Certifications

Microsoft PL-300 – Power BI Data Analyst
In progress (2025–2026)
Python for Data Science (Udemy)
2021
Power BI Desktop for Business Intelligence (Udemy)
2024

Interests

🏃 **Sports:** football, swimming, running, hiking
📖 **General knowledge and History**
🎵 **Music** (listening and playing)

Profile

Data Analyst | Power BI · DAX · SQL · Python · Azure

5 years of experience in Business Intelligence, with a core focus on Power BI (modeling, DAX, Power Query M, RLS, performance optimization) and a working foundation in cloud environments (Azure, first steps with GCP/BigQuery). Used to gathering business requirements, designing decision-support data models from varied source systems, and delivering reliable, well-documented reports — with, on occasion, predictive analysis in Python. Experience working with Finance, Logistics, Operations and Healthcare departments.

Skills

Visualization & BI

Power BI (advanced DAX, Power Query M, Tabular Editor, RLS), Microsoft Fabric (basics), Tableau, SSRS, Qlik.

Cloud & Data Platform

Azure (Data Factory, Power BI Service, Databricks) — primary cloud platform. Basics: GCP/BigQuery, AWS (S3), Snowflake, EntraID/CoreView. Git.

Data Processing & SQL

SQL / T-SQL (CTEs, window functions, stored procedures), ETL/ELT, SSIS, dbt (basics), dimensional modeling.

Automation & Reporting

Python (scripting, automation, early predictive analysis), M Language, Excel (Power Pivot, VBA), Power Automate.

Experience

Data Analyst Paris
Xelians Archivage 01/2023 – 12/2025 (3 years)
• Migrated the BI system (SSRS → Power BI) with a centralized SQL Server data warehouse — cut reporting time by 40%.
• Built ETL/ELT pipelines (SSIS, Power Automate) and dimensional models (star / snowflake schema).
• Optimized data models and query response times (partitioning, DAX tuning, aggregations) on the most-used reports.
Stack: Power BI, DAX, SQL Server, SSIS, SSRS, Power Automate, Azure, Git.
Business Intelligence Consultant Paris
CIAMT (Santé au travail) 12/2021 – 12/2022 (1 year 1 month)
• Power BI reporting covering 3,000+ employees; SQL → Power BI pipelines cutting turnaround time from 3 days to a few hours.
• Predictive modeling (regression, K-means clustering) to optimize medical appointment scheduling.

Stack: Power BI, SQL, Python (Pandas, Scikit-learn), R, Padoa.
Business Intelligence Intern Paris
CIAMT (Santé au travail) 06/2021 – 11/2021 (6 months)
• Structured business data and built the first KPI dashboards.

Stack: SQL, Power BI, Python, R, Excel.

Data Analyst Algiers, Algeria
Icosium Technologies 09/2019 – 08/2020 (12 months)
• Built KPI dashboards, extracted and cleaned multi-source data, translated business needs into reporting.

Stack: SQL, Power BI, Excel (Power Pivot, VBA).

Education

Master's Degree – Data Analysis and Probability Master's Degree
Université de Lorraine – CentraleSupélec Metz, France • 2020 – 2021
Master's Degree – Applied Mathematics for Data Analysis Master's Degree
Université de Biskra, Algeria 2017 – 2019
